

COLUMBUS THOROUGHFARE PLAN

The Columbus Thoroughfare Plan ordinance and map were approved by Columbus City Council on December 6, 1993. This ordinance replaces the Thoroughfare Ordinance adopted in 1981.

The purpose of the Thoroughfare Plan is to establish locations and minimum design standards for the future arterial street network within the city. All streets and highways are classified into ten categories ranging from freeways (Type "F") to two-lane streets (Type "C"). This ordinance is a planning tool used to promote the orderly development of a safe and efficient street system.

This Thoroughfare Plan was prepared as part of the Columbus Comprehensive Plan development process including analysis by the Divisions of Traffic Engineering, Engineering and Construction, and Planning. Extensive community input was an integral part of the development of the Comprehensive Plan and Thoroughfare Plan. Any land development or construction activity adjacent to a street listed on the Plan should consider the ultimate street improvements planned for that portion of the street system.

The ordinance provides for periodic amendments to the Thoroughfare Plan. We welcome any suggestions or questions you may have regarding this important planning document.

ORD. NO. 2518-93 To adopt the Columbus Thoroughfare Plan and to repeal Ordinance No. 1513-81.

WHEREAS, the City of Columbus in its daily operations must revise and update those plans and ordinances related to the health, safety, and welfare of the general public which pertain to the street system within the City's corporate limits and three miles jurisdiction therefrom; and,

WHEREAS, since the mid-1950s Columbus has had a Thoroughfare Plan which has coordinated the planning efforts of all involved with street transportation; and,

WHEREAS, the current Thoroughfare Plan and Arterial Construction Types (Ord. 1513-81) is now outdated due to significant changes in City plans as well as living, employment and traffic patterns; and,

WHEREAS, as part of the process to develop the Columbus Comprehensive Plan, the proposed Columbus Thoroughfare Plan has been developed, reviewed, and discussed with many civic business groups and is recommended for passage by the Columbus Traffic and Transportation Commission and the Columbus Development Commission; and,

WHEREAS, the Columbus Thoroughfare Plan, while submitted as separate legislation for Council consideration, is a part of the Columbus Comprehensive Plan; and,

WHEREAS, the Development Department, the Division of Engineering and Construction, and the Division of Traffic Engineering and Parking are charged with developing the street system herein described for the preservation of the public health, welfare, and safety; now, therefore

BE IT ORDAINED BY THE COUNCIL OF THE CITY OF COLUMBUS:

SECTION 1.

That for the purposes of this ordinance the following words and phrases shall have the meaning ascribed to them as follows:

ARTERIAL STREET: any street, roadway, or highway whose primary function is to move vehicles from one section of the city or county to another.

CORRIDOR: a generalized alignment along which an arterial street is located. Corridors are either existing or proposed. Existing corridors are those corridors along existing streets. Proposed corridors are those corridors connecting two existing streets.

MAINLINE SECTION: that portion of the arterial street lying between intersections of arterial streets.

MEDIAN DIVIDER: a raised concrete or grass barrier separating opposing flows of traffic; of a painted separation at street grade of no less than four feet in width separating opposing flows of traffic; or a series of painted left turn lanes occurring at all intersections in addition to the through lanes; or continuously painted opposing left turn lane.

SERVICE ROAD: a roadway of a minimum twenty foot width, generally paralleling the arterial street, the function of which is to intercept the vehicles from adjacent property and channel these vehicles to controlled points of egress to the arterial street.

Note: Arterial diagrams are contained in original ordinance and are available in the Clerk's Office.

SECTION 2.

That the map entitled "Columbus Thoroughfare Plan" and identified and maintained by the Division of Traffic Engineering and Parking is hereby adopted by this Council as the minimum recommended standards for right-of-way and pavement construction.

SECTION 3.

That the existing and proposed corridors listed in this ordinance and indicated on the "Columbus Thoroughfare Plan" represent the arterial street system of the Thoroughfare Plan. The actual alignment of arterial streets along proposed corridors will be determined by engineering feasibility studies with alternate proposals examined, or by other developing land use patterns.

SECTION 4.

In urban areas where extensive development has taken place and no right-of-way has been acquired for future widening the stated minimum right-of-way and pavement required for such roadway will be determined at the time a roadway improvement is recommended. and on the basis of neighborhood concern. For such roadways, the arterial type shall serve as the functional classification of the roadway.

SECTION 5.

That ten classifications of arterial streets are established as the desirable and minimum recommended standards for right-of-way and pavement for mainline sections according to typical sections in the Division of Engineering and Construction and the following table:

ARTERIAL TYPE	MINIMUM RIGHT-OF-WAY	NUMBER OF MOVING LANES	PAVEMENT WIDTH	MEDIAN DIVIDER	SERVICE ROAD
F	varies	varies	varies	yes	no
6-2DS	220 ft.	6	88 ft. A, B	yes	yes
6-2D	160 ft.	6	88 ft. B	yes	no
6-2	120 ft.	6	72 ft.	no	no
4-2DS	196 ft.	4	72 ft. A, B	yes	yes
4-2D	120 ft.	4	72 ft. B	yes	no
4-2	100 ft.	4	56 ft.	no	no
3-1	80 ft.	3	52 ft.	no	no
2-1	60 ft.	2	36 ft.	no	no
C	60 ft.	2	36 ft.	no	no

A Includes only arterial pavement. Service road pavements of 24 foot width are normally located approximately 40 feet from outside edge of arterial pavement.

B Includes median divider.

SECTION 6.

That the following list of existing and proposed corridors shown on the "Columbus Thoroughfare Plan" are hereby designated as shown:

SECTION 7.

That all other existing and proposed corridors not otherwise designated by another section of this Ordinance shall have a minimum right-of-way width of 50 feet wherever possible except those corridors which, at the time of development, are determined to serve as collector streets for the area under development and adjacent areas. Such corridors shall have a minimum right-of-way width of 60 feet wherever possible and be constructed as Type "C" Arterials wherever possible.

SECTION 8.

That the Columbus Thoroughfare Plan established by this ordinance shall apply within the corporate limits as they now or hereafter may exist and shall apply outside the corporate limits only in those areas in which the City of Columbus may now or hereafter be authorized by law to regulate.

SECTION 9.

That the Development Department, the Division of Engineering and Construction, and the Division of Traffic Engineering and Parking shall periodically review the arterials and their construction types as part of the process of amendment and revision of the Columbus Comprehensive Plan and shall submit proposed changes in the form of an amendment to this ordinance.

SECTION 10.

That ordinance No. 1513-81 is hereby repealed.

SECTION 11.

That this ordinance shall take effect and be in force from and after the earliest period allowed by law.

Passed December 6, 1993
 CYNTHIA LAZARUS, President of Council
 Approved December 7, 1993
 GREGORY LASHUTKA, Mayor
 Attest
 TIMOTHY McSWEENEY, City Clerk

ARTERIAL TYPES

Columbus Thoroughfare Plan

TYPE "F" ARTERIAL

A Type "F" Arterial is any arterial street as defined in Chapter 2101, Columbus City Codes as a "Freeway" or "Expressway." Such arterials shall have right-of-way and pavement widths as determined to be necessary to accommodate traffic needs.

TYPE "6-2DS" ARTERIAL

A Type "6-2DS" Arterial is an arterial street having a minimum right-of-way width of 220 feet wherever possible. Such arterial streets shall wherever possible, be designed to accommodate an 88 foot pavement consisting of six moving lanes with median divider on mainline sections and parallel service roads.

TYPE "6-2D" ARTERIAL

on mainline sections.

A Type "6-2D" Arterial is an arterial street having a minimum right-of-way width of 160 feet wherever possible. Such arterial streets shall, wherever possible, be designed to accommodate an 88 foot pavement consisting of six moving lanes with median divider

designed to accommodate a 72 foot pavement consisting of six moving lanes on mainline sections.

TYPE "6-2" ARTERIAL

A Type "6-2" Arterial is an arterial street having a minimum right-of-way width of 120 feet wherever possible. Such arterial streets shall, wherever possible, be

designed to accommodate a 72 foot pavement consisting of four moving lanes with median divider on mainline sections and parallel service roads.

TYPE "4-2DS" ARTERIAL

A Type "4-2DS" Arterial is an arterial street having a minimum right-of-way width of 196 feet wherever possible. Such arterial streets shall, wherever possible, be

designed to accommodate a 72 foot pavement consisting of four moving lanes with median divider on mainline sections.

TYPE "4-2D" ARTERIAL

A Type "4-2D" Arterial is an arterial street having a minimum right-of-way width of 120 feet wherever possible. Such arterial streets shall, wherever possible, be

pavement consisting of four moving lanes on mainline sections.

TYPE "4-2" ARTERIAL

A Type "4-2" Arterial is an arterial street having a minimum right-of-way width of 100 feet wherever possible. Such arterial streets shall, wherever possible, be designed to accommodate a 56 foot

moving lanes and two parking or additional moving lanes in one direction.

TYPE "3-1" ARTERIAL

A Type "3-1" Arterial is an arterial street having a minimum right-of-way width of 80 feet wherever possible. Such arterial streets shall, wherever possible, be designed to accommodate a 52 foot pavement consisting of three

designed to accommodate a 36 foot pavement consisting of two moving lanes and two parking or additional moving lanes in one direction.

TYPE "2-1" ARTERIAL

A Type "2-1" Arterial is an arterial street having a minimum right-of-way width of 60 feet wherever possible. Such arterial streets shall, wherever possible, be

pavement consisting of two moving lanes and two parking or additional moving lanes in two directions.

TYPE "C" ARTERIAL

A Type "C" Arterial is an arterial street having a minimum right-of-way width of 60 feet wherever possible. Such arterial streets shall, wherever possible, be designed to accommodate a 36 foot
